Experience of tutoring

Please explain the reason for your rating in question 1

- I really appreciated having tutorials weekly - I've done some subjects where they take place fortnightly and even just 4 per semester. Having a few practice questions each week, covering the material from the lectures, was really beneficial.
- In some cases the mathematical proofs did not seem to be reflected in lecture slides, or rather it did not seem that we had the tools to solve them based on lecture notes. For example i did not feel i had the ability to solve the content of tutorial 9 based on what i had been taught. This is not due to any fault of the tutor, but rather i feel the lectures had not adequately prepared me for this.
- Relate problems to lecture slides - always attends lectures
- The content for each week was clearly linked to what we had learned in lectures, but the tutorial questions sometimes seemed much harder than those covered in lectures, and sometimes required long maths derivations that were not covered in lectures.

Please explain the reason for your rating in question 2

- Has clear understanding of material and delivered its solutions in an easy to follow manner
- He uses very interesting examples and contexts to make everything easier to understand.

Please explain the reason for your rating in question 3

- Gave us guidelines where appropriate
- The tutor (Rohan) always told us which questions were more likely to be assessed, and went over past problem sets very clearly so we wouldn't make similar mistakes on the next ones.

Please explain the reason for your rating in question 4

- Could answer questions thoroughly

Please explain the reason for your rating in question 5

- Obviously very well prepared, and well-rehearsed in presenting.
- Prepared written answer for himself - did most questions with time available
- With some of the more difficult tutorial sessions Rohan presented answers to proofs on power point, my understanding was that this was so he could explain the key concepts, however i find that this makes the proof more overwhelming. For example i find the intuition of solving the problem is easier to understand when it is solved step by step on the board.

Please explain the reason for your rating in question 6

- Made sure the class understood the material by making us participate
- Exceptional in this regard

Please explain the reason for your rating in question 7

- Great tutor with good understanding of subject and excellent teaching skills
- The tutes were very good - Rohan knew his stuff, and was engaging in presenting the material. He tried to encourage participation, and made the class a fun place to be.

I learned a lot from the tutes.

- Very (Y)
- Very lucky to have Rohan, he's very nice and caring :)
- very happy with the quality of teaching
